The first part of the assignment (worth 25 pts):

Match the common brand and generic controlled drugs with their Drug Enforcement Agency (DEA) schedules.

Federal Controlled Drug Schedules (Use table 2.1 in Ch. 2)

Directions: In the space provided, mark each drug's appropriate DEA Schedule: I, II, III, IV, or V.

Drug	***CI***	***CII***	***CIII***	***CIV***	***CV***
Hydrocodone					
Phenobarbital					
Testosterone					
Alprazolam					
Morphine					
Hydrocodone with aspirin					
Methylphenidate					
Lortab					
Carisoprodol					
Lorazepam					
Oxycodone					
Codeine cough syrups					
Lomotil					
Vicodin					
Anabolic steroids					
Diazepam					
Amphetamine					
Heroin					
Oxycodone with acetaminophen					
Fentanyl citrate					

Drug	***CI***	***CII***	***CIII***	***CIV***	***CV***
Clonazepam					
Eszopiclone					
Tramadol					
Zolpidem					
Cannabis (marijuana)					

The second part of the assignment (worth 24 pts) :

Pick out two drugs from the list above.

Research what the medication indication is (what it is used for), dosage and administration, indication and usage, contraindications, and precautions. The goal for this assignment is to get familiar with the medication guides. Below is an example of a drug that can be an injectable or intravenous infusion. The medication guides can be overwhelming at first because there is so much information, but you will get comfortable with them over time.
